Office Action Summary	Application No. 10/764,964	Applicant(s) RUESCH ET AL.	
	Examiner Gerald A. Michalsky	Art Unit 3753	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The disclosure is objected to because of the following informalities: On page 6, line 23, the spelling of "just" should be corrected.

Appropriate correction is required.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8, 10-17, and 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Butcher in view of Harris. Claims 1, 11, and 21 are considered met by Butcher except for an optical sensor. It would have been obvious in view of optical sensor 162 and solenoid valve 118 of Figures 10-17 of Harris to substitute an optical sensor for the float 9 of Butcher and solenoid valves for the air release and liquid outlet valves of Butcher in order to minimize the number of mechanical elements. The details of the dependent claims, such as transistors, normally open or normally closed optical switches, and a low flow liquid outlet valve are obvious matters of design well within the ambit of a person of ordinary skill in the art at the time the invention was made since applicants assert no criticality in these features.

4. Claims 9 and 18-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Butcher in view of Harris as applied to claims 1 and 11 above, and further in view of Stein. These claims are considered met as above except that the optical sensor 162 of Figures 10-17 of Harris is not described as a "prism". It would have been obvious in

Art Unit: 3753

view of Stein that a prism is a well known type of optical sensor for controlling a gas outlet valve.
